

Pro AV-over-IP Solutions

Record • Stream • Translate • Track • Control

Designed for
Education, Business, Government,
Healthcare, Worship, Events, and many more uses

4K Dante NDI HX SRT
READY

Media Stations

Lecture Capture Devices

Encoder, decoder, switcher, mixer, recorder, and streamer – Media Station is all of that.

IR and Microphone-based Tracking Systems

Auto-tracking for Speakers and Presenters

Automatic speaker tracking with layout and overlay generation, auto-switching, integration with discussion systems, seamless connection of PTZ cameras and other devices.

Live Caption and Translation Solutions

Speech-to-Text Station and Two-Way AI Translator

Accurate, real-time AI captioning and translation devices that do not rely on humans.

Control Station

Controller without Programming

Combined video switcher and streamer that can control AV and other devices through network and physical interfaces.

AREC Media Stations

AREC Media Stations are lecture capture devices that are made to capture, mix, switch, record, stream, and backup audio and video sources easily and efficiently. Depending on the model, they can support simultaneous recording of 2, 3, or 4 video channels and feature different input and output interfaces.

Integrated with

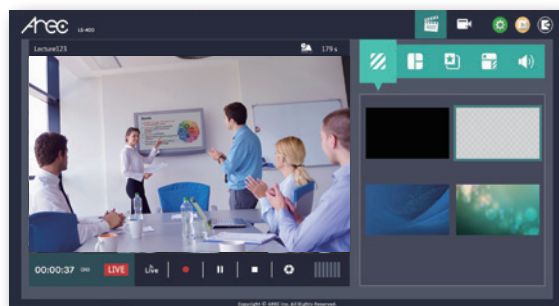

Versatile Control Options

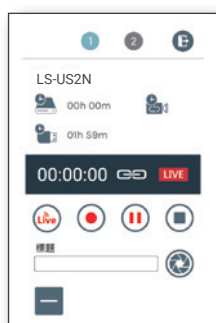

- On-screen GUI with mouse/touch USB control

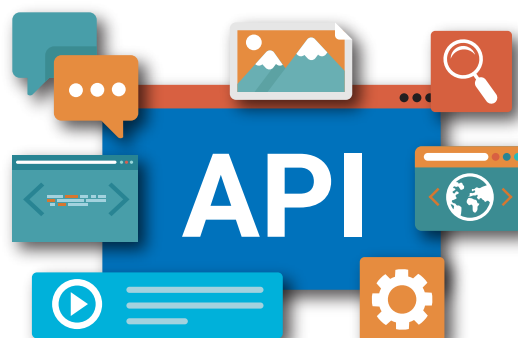

- Web-based Online Director

- Mini Controller for mobile devices

- API for RS-232/TCP/HTTP control
